Aesthetic Surgery*

Head and Neck Surgery

My head and neck interests include parotidectomy and neck dissection for head and neck cancer, major head and neck tumour excision with skull base surgeons and microvascular head and neck reconstruction following head and neck excision. 10% of sarcoma tumours involve head and neck surgery.

I also perform nasal reconstructions following cancer excision and treat facial palsy in adults. As part of my facial palsy practice, I perform unilateral facelift procedures with static sling, blepharoplasty, brow lift and gold weight insertion.

Soft tissue sarcoma & Reconstruction

I am the lead clinician for the adult soft tissue sarcoma service for the West of England. We treat all patients with soft tissue sarcomas including head and neck sarcoma and micro-vascular reconstruction. I also manage patients with chest wall sarcoma with large rib resections and reconstruction, abdominal wall tumours, and breast sarcoma.

Aesthetic Surgery

My aesthetic practice includes facial surgery, breast aesthetic surgery and body procedures. My clinic also provides non-surgical procedures. My special interest is rhinoplasty.

Aesthetic operations performed include the following:

Face: Facelift, necklift, rhinoplasty, blepharoplasty, otoplasty, hairline lowering foreheadplasty, lip lift, revision procedures.

Breast: breast augmentation, uplift, reduction, augmentation mastopexy, gynaecomastia reduction, revision procedures.

Body: abdominoplasty, liposuction, thigh lift, lower body lift, brachioplasty. revision procedures.

Nose: rhinoplasty - open and closed, revision procedures.

Trauma Surgery

My on-call commitment involves the management of plastic surgery trauma. This is wide ranging from facial trauma, upper limb trauma and lower limb trauma.

Many cases involve hand trauma, both soft tissue and hand fractures.

Upper and lower limb trauma often involves soft tissue reconstruction with free tissue transfer.

Humanitarian work

Facial Surgery in Africa

For the past 6 years, I have traveled to Ethiopia to treat afflicted patients with the condition Noma, a necrotising facial infection resulting in soft tissue destruction and loss. This is with the NGO 'Facing Africa'. This involves resection and reconstruction of large facial defects for functional and aesthetic purposes. Sub-mental artery flaps and microvascular free flaps are used for reconstruction. We also treat patients with leprosy who need total nasal reconstructions.

Rhinoplasty Experience

I am also a qualified dentist with several years of maxillo-facial experience managing patients with fractured noses and performing rhinoplasty for post-traumatic noses. During my plastic surgery residency, I assisted many aesthetic rhinoplasty cases. As a fellow in Perth, Australia and in my current NHS role as a facial plastic surgery consultant, I perform many post-traumatic rhinoplasties and reconstruct noses following cancer excision. In my aesthetic surgery practice I perform up to 4 cosmetic rhinoplasties per week. In my role as volunteer facial plastic surgeon in Addis Ababa, I perform total nasal reconstructions for patients with noma and leprosy. In the NHS I perform total nasal reconstruction following mid-facial cancer excision.

Annual BAAPS conference, UK.

Preservation Rhinoplasty conference Rome 2019

Facial aesthetic surgery masterclass (CCR/ISAAPS) 2019

Preservation Rhinoplasty conference Nice 2020

Aesthetic Experience

I was fortunate to conduct my plastic surgery residency throughout the golden era of aesthetic surgery training within the NHS. From breast reductions and augmentations to rhinoplasty, blepharoplasty and abdominoplasty, these procedures were commonplace and ideal registrar training operations under the supervision of aesthetic masters. My fellowship in Perth, Australia afforded me further aesthetic surgery training mainly in breast surgery and rhinoplasty. As a Consultant in the NHS I still perform occasional breast reductions, abdominoplasty and post-traumatic rhinoplasty, in this commissioned era. I have been in private cosmetic surgery practice since 2010. My practice has grown to a busy service run from my Bristol private clinic. We offer a wide range of facial, breast and body procedures. We pride ourselves in offering a bespoke, personal high quality service without exception. This is on the backbone of my facial plastic surgery training and experience as a head and neck reconstructive surgeon. I participate in regular audit of my practice and publish my data annually on the BAAPS database.

We also convene a regular local aesthetic MDT and audit group to monitor our practice and maintain high standards.

With over fourteen years experience of aesthetic surgery, I now regularly see patients for second opinions and revision surgery.

I am a member of the following aesthetic organisations: British Association of Aesthetic Plastic Surgeons(BAAPS), British association of Plastic, Reconstructive and Aesthetic Surgeons(BAPRAS), American Society of Plastic Surgeons(ASPS) and the Rhinoplasty Society of Europe(RSE).

Frequently attended meetings include BAAPS, BAPRAS, Stuttgart Rhinoplasty Meeting and Botti Aesthetic meeting in Salo, Italy.
