EUROSILICONE

Eurosilicone

Eurosilicone is a leading manufacturer within the global plastic surgery community. We are an innovative developer and manufacturer of a complete range of quality surgical implants and tissue expanders.

Eurosilicone products are manufactured in state-of-the-art facilities in Apt, France and in full compliance with ISO and EN requirements and are CE certified according to the Medical Device Directive 93/42/EEC.

The exact dimensions of the products may vary slightly from the dimensions indicated in the catalogue but they remain in conformity with our specifications.

Breast Aesthetics

Introduction to Breast Aesthetics

Shapes:

- Round: The Round Collection
- Anatomical: The Matrix

Silicone Gel:

Eurosilicone's cohesive silicone gels are colour coded to show different levels of firmness.

- Soft Cohesive Gel
- Natural Cohesive Gel

Shell surface:

- Smooth
- Crystalline Microtextured
- Crystalline Textured

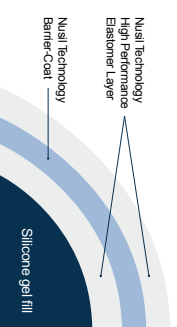

Crystalline Microtextured Crystalline Textured

Crystalline:

Eurosilicone's latest texturing technology favours tissue adherence and reduced incidences of capsular contracture.

Paragel:

Eurosilicone's 360° barrier layer technology minimizing gel diffusion.

Premium Patient Warranty:

Lifetime product replacement warranty, for details view our brochure.

Instructions for use:

We encourage surgeons to refer to the package insert supplied with every Eurosilicone product for instructions for use, indications, contraindications and warranty.

The Matrix by Eurosilicone

The Matrix

9 different profiles with 90 configurations
Crystalline Textured shell

- Natural Cohesive Gel

The Matrix

by Eurosilicone

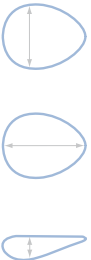

- ✓ 9 different cells with 90 different variations and sizes of anatomical shaped breast implants.
- ✓ A unique preoperative planning system for greater precision and custom fitting.
- ✓ Variable heights: Low, Moderate and Full - which is determined by the patient's measurements of the distance between the existing SN-N (Sternal Notch - Nipple).
- ✓ Variable projections: Low, Moderate and High - which meets the patient's desire for small, moderate or large projection.
- ✓ Natural Cohesive Gel: Form stable high cohesive silicone gel-fill material - provides greater safety and controlled gel distribution.
- ✓ Crystalline Textured: Eurosilicone's latest texturing technology favours tissue adherence and reduced incidence of capsular contracture.
- ✓ Paragel 360° Barrier Layer: Eurosilicone's barrier layer technology minimizing gel diffusion.

Round Collection

- ✓ 11 different profiles with 219 variations.
- ✓ Variable projections: Low, Medium, Medium Extra-High, High, Extra high - which meet the patient desire for low, moderate or large augmentation.
- ✓ Shell surface: Smooth or Crystalline Microtextured.
- ✓ Silicone gel: Soft Cohesive or Natural Cohesive.
- ✓ Paragel 360° Barrier Layer: Eurosilicone's barrier layer technology minimizing gel diffusion.

Soft Cohesive Design

Soft Cohesive Design Smooth Shell

ES 26 Low Profile	ES 261 Medium	ES 28 High	ES 281 Extra High

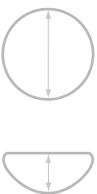

- ✓ 4 different profiles with 80 different variations.
- ✓ **Soft Cohesive Gel:** Form stable cohesive silicone gel - provides greater safety and eases manipulation and insertion.
- ✓ **4 variable projections:** Low, Medium, High and Extra High - which meet the patient's desire for low, moderate or large augmentation.
- ✓ **Paragel 360° Barrier Layer:** Eurosilicone's barrier layer technology minimizing gel diffusion.
- ✓ **Smooth shell surface.**

Tissue Expanders

Round Design

Rectangular Design

Cylindrical Design

Croissant Design

Anatomical Vertex

Eurosilicone tissue expanders are available in 6 different configurations

- Round shape, smooth
- Rectangular shape, smooth
- Cylindrical Curved and Straight shape, smooth
- Croissant shape, smooth
- Vertex anatomical breast shape, textured shell

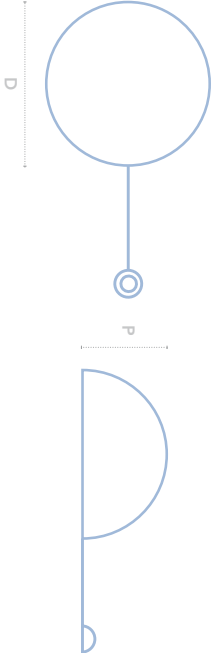

All device dimensions correspond to the suggested fill volume.

Eurosilicone tissue expanders should be filled with a sterile isotonic solution only.

A fill tube is connected to every tissue expander to allow inflation of the device through an injection port.

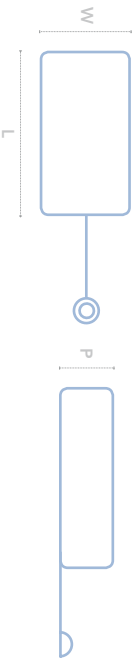

All Eurosilicone tissue expanders with a recommended fill volume of more than 100cc are provided with a 28mm injection port, smaller volume devices are provided with a 20mm injection port.
