Implantech[®]

SEPTEMBER 2019

Superior Facial & Body Aesthetics

Designed by prominent surgeons, Implantech's facial implants provide the youthful, cosmetic and reconstructive solutions desired by your patients. Count on our comprehensive line of silicone and expanded polytetrafluoroethylene (ePTFE) facial implants for industry-leading innovation and effective, pleasing outcomes.

To enhance body areas, accept nothing less than our solid-silicone ContourFlex™ and PowerFlex™ products. Soft and supple, Implantech's gluteal, pectoral and calf implants provide shaped volume and smoothed edges for the most natural look and feel. Our expanded lineup now includes more styles, with smooth and textured options for all three body-contouring areas and super-soft gluteal and pectoral selections.

If no stock product is appropriate, tap into our patient-specific resources. We faithfully reproduce silicone implants either from CT scans with our 3D Accuscan® service or from a mold you make with one of our Moulage Kits. Or, carve your own from silicone blocks of different sizes, shapes and durometers.

For scar management, our Cimeosil® products are specifically formulated for the topical management of keloids and hypertrophic scars. Our Cimeosil Scar and Laser Gel also helps with any scarring or redness associated with laser surgery, dermabrasion and chemical peels. Made of stretchable, fabric-covered silicone gel, our Gelzone® Wraps combine compression healing, musculoskeletal support and scar management.

You can also depend on Implantech for sheeting and tubing. We offer sterile ePTFE and silicone sheeting for short term or long term applications and non-sterile, implant grade and health care grade silicone tubing.

Get the service, quality, innovation and choices you and your patients deserve. Welcome to Implantech!

SILICONE FACIAL IMPLANTS

All Supplied Sterile

Crafted with the highest quality of implant grade silicone, our implants are ideal for augmenting chin, midfacial, mandibular, nasal and other facial areas.

Choose from over 35 styles and variations of facial implants for a long term, symmetric and pleasing look, including:

- Our core line of trusted, time-tested silicone implants
- Conform™ silicone implants with a grid-like backing that readily adapts to bony contours

Conform™ Extended Anatomical Chin

Evolution of all of the technology and design of our previous chin implants. Incorporates the patented Conform™ grid pattern to allow for easier implant insertion and to closely conform to underlying bony structure.

Cat. No.	Size	A	B	C	D	E	F
CEAC-S	Small	5.0	1.00	0.43	8.0	3.5	0.2
CEAC-M	Medium	5.6	1.20	0.50	10.0	4.2	0.3

FMG-VSIZ-NS	Sizers	Complete Set					

Dimensions in centimeters

Vertical Lengthening Chin

Designed by Barry L. Eppley, MD, DMD

Designed to address a three-dimensional chin deficiency. Implant secures to the lower edge of the anterior jawline to provide both a downward 45-degree augmentation and a horizontal projection. Creates a more elongated face and triangular jawline-chin shape.

Cat. No.	Size	A	B	C	D	E	F	G
VLCS	Small	6.5	1.4	0.79	9.0	3.6	0.52	0.55

Chin Sizing Guide suggested by Steven J. Pearlman, MD, FACS

Dimensions in centimeters

Conform™ Mandibular Angle

Compared to the Lateral Mandibular Angle (TMA), this implant's shortened ramus, longer mandibular dimensions and slightly more lateral projection put more emphasis on the angle prominence and mandibular definition. Patented Conform™ grid pattern readily adapts to the gonial angle. Specify Catalog No. for "Left (L)" or "Right (R)". Single-packed (not in pairs). Save by purchasing a pair.

Cat. No.	A	B	C	D	E	F	G

CMA-SIZ-NS	Sizers	Complete Set					

Dimensions in centimeters

Widening Mandibular Angle

Designed by Barry L. Eppley, MD, DMD

Features less lateral projection than the Conform™ Mandibular Angle (CMA) and a more defined angle prominence. Extended mandible and shortened ramus edges help enable a more ideal fit to jaw angle. Specify Catalog No. for "Left (L)" or "Right (R)." Single-packed (not in pairs). Save by purchasing a pair.

WMA-10R	3.6	1.0	4.6
WMA-SIZ-NS	Sizers	Complete Set	

Dimensions in centimeters

Vertical Mandibular Angle

Designed by Barry L. Eppley, MD, DMD

An innovative jaw implant design that creates a distinct jaw angle shape below the patient's natural jawline. Vertically lengthens the short ramus to more clearly define the jaw angle. This also results in a more aesthetically pleasing widened lower face. Specify Catalog No. for "Left (L)" or "Right (R)." Single-packed (not in pairs). Save by purchasing a pair.

TEMPORAL IMPLANTS

Temporal Shell

Designed by Barry L. Eppley, MD, DMD

An ideal solution for temporal hollowing due to genetics or trauma. Soft and flexible, the silicone Temporal Shell provides soft-tissue volume (muscle enhancement) for an aesthetically pleasing appearance. Specify Catalog No. for "Left (L)" or "Right (R)". Single-packed (not in pairs). Save by purchasing a pair.

Dimensions in centimeters

Temporal Shell – Extended

Designed by Barry L. Eppley, MD, DMD

The extended temporal implant provides augmentation to both upper and lower temporal regions. From the top of the zygomatic arch to the anterior temporal line of the forehead, it provides correction of temporal hollowing through augmentation of the full vertical length of the muscle. Its tapering design allows the implant to blend smoothly into the temporal region without visible edges. Specify Catalog No. for "Left (L)" or "Right (R)." Single-packed (not in pairs). Save by purchasing a pair.

ePTFE PRODUCTS

expanded polytetrafluoroethylene

Composite™ Facial Implants

Made of flexible silicone fully encased in a .3mm layer of expanded polytetrafluoroethylene (ePTFE), our Composite™ Facial Implants feature the best of both materials: silicone's shape retention and aesthetic feel plus the stabilizing tissue attachment promoted by ePTFE.

Solid ePTFE Facial Implants

Comprised of solid yet supple ePTFE, these implants feature a microporous nature that permits tissue in-growth for a more stable, predictable outcome. Moreover, this proven biomaterial promotes a natural look and feel.

ePTFE Sheeting

Sheeting of ePTFE is biostable, biocompatible and hydrophobic, making it versatile and effective for a wide range of applications. Implantech's ePTFE sheeting comes in a variety of useful lengths, widths and thicknesses.

ePTFE-Coated Extended Anatomical Chin

INSTRUMENT-RELATED

In addition to our implantable devices, Implantech offers effective, quality items for your surgical needs.

- Periosteal Elevators – These precision instruments were designed by surgeons for surgeons to form a more optimal facial implant pocket.
- SE-100 Smoke Aspiration Tip – Protect yourself from electrocautery smoke that carries hazardous contaminants, including known carcinogens.

Periosteal Elevators

Elevators are handcrafted in Germany from surgical-grade stainless steel, and more easily create an optimal pocket for Implantech facial implants. Save by purchasing all three sizes.

Cat. No.	Width	Length
ELE-04	0.4 cm	7 in.
ELE-06	0.6 cm	7 in.
ELE-10	1.0 cm	7 in.

SE-100 Smoke Aspiration Tip

Simple and effective. Removes smoke, particles and body fluids. Universally adaptable to all electrocautery pencils. Clear for improved visibility. Can be cut to any length. Sterile packaged and disposable.

Cat. No.	Description
SE-100-10	Box of 10
SE-100-25	Box of 25

SILICONE CARVING BLOCKS

Implantech's silicone carving blocks are easily fashioned into patient-specific implants. Choose from multiple shapes with varying durometers:

- Contoured blocks
- Rectangular blocks

Contoured Carving Block – Style 1

Implant-grade silicone pre-formed and carvable. Made of soft-solid silicone elastomer.

BODY-CONTOURING IMPLANTS

Implantech's high-quality body-contouring implants mean greater confidence for your patients, giving men a more muscular look and women a more curvaceous shape. Unlike shells filled with gel or saline for breast enhancement, our body-contouring implants are solid yet soft to mimic large muscles for aesthetic purposes or correcting deformities.

Symmetry, predictable volume and a seamless transition help ensure the most natural-looking patient outcomes for:

- Gluteals
- Pectorals
- Calves

GLUTEAL IMPLANTS

ContourFlex™ Gluteal – Round

Provides a prominent, round fullness to the buttock. Can be rolled for insertion into small surgical incisions. Hand-smoothed edges fit the patient more naturally with both subfascial and intramuscular placements. Single-packed (not in pairs).

ContourFlex™ Calf - Aiache Style (Textured or Smooth)

These calf implants are designed by Dr. Adrien Aiache, a pioneer in calf augmentation. Most sizes are available in a smooth (S) or textured (T) surface. The large variety allows selecting the right width to height ratio to achieve the desired results. Manufactured in soft (slightly firmer than the durometer used in gluteal and pectoral implants) solid silicone durometer. Single-packed (not in pairs).

3D ACCUSCAN PATIENT-SPECIFIC[®] IMPLANTS

While our implant lines are quite comprehensive, stock items are occasionally insufficient for a patient's needs. As such, you can depend on Implants' patient-specific products for an ideal solution.

Offerings include:

- 3D Accuscan[®]
- Moulage Kits

3D Accuscan Patient-Specific® Implants

With 3D Accuscan®, you now have the ability to quickly and easily reconstruct most bony defects and soft tissue deficiencies. Simply supply us with the appropriate CT scan, and we will schedule a virtual planning session during which we will assist you in designing an implant specifically for your patient. Additionally, we can produce a 3D model of your patient's anatomy as a consultation or surgical aid. Contact us for additional information.

Moulage Kits

Each kit contains all items and instructions needed for you to fabricate a casting (or *moulage*) of your patient's defect. We then faithfully recreate an implant-grade silicone implant from your moulage.

Cat. No.	Material	Plaster Moulage Kit
IMK-1	Plaster	Contains enough material to fabricate a cellulose plaster moulage approximately 15cm x 15cm in area, and 2cm in thickness.

Cat. No.	Material	Silicone Moulage Kit
IMK-2	Silicone	Contains enough material to fabricate a silicone moulage approximately 14cm x 18cm in area, and 1.5cm in thickness.

SILICONE SHEETING & TUBING

Implantech is the ideal source for all your silicone sheeting and tubing needs.

Choose from a variety of products to meet your medical applications, including:

- Silicone sheeting
 - ◆ Reinforced or non-reinforced
 - ◆ Long term or short term implantable
- Silicone tubing
 - ◆ Implant Grade
 - ◆ Health Care Grade

SCAR MANAGEMENT

Cimeosil®

Cimeosil® Scar and Laser Gel and gel sheeting are silicone-based products designed to improve the appearance of scars, particularly those that are raised, red and sometimes itchy and/or painful. Cimeosil is an outstanding treatment for scars occurring from accidents, heart surgery, cesarean sections, abdominoplasty and breast reconstruction.

Gelzone® Wrap

Made of stretchable, fabric-covered silicone gel, the patented Gelzone® Wrap is the only choice that combines compression healing, musculoskeletal support and scar management. The wrap stays exactly where it's put while providing ideal uniform compression. Excellent for flattening and fading keloids and hypertrophic scars. *See our selection of Gelzone wraps in our orthopaedic section on pages 46 - 47.*

Cimeosil® Scar and Laser Gel

Cimeosil® Scar and Laser Gel is topically applied to soften, flatten and fade scars (particularly those that are raised and red) as well as to manage any scarring and redness from facial laser surgery. Made only of the highest quality medical-grade silicone, Cimeosil Scar and Laser Gel is safe for both adults and children when used as directed. May be worn over sunscreen and under makeup. Choose from 5 gram and 14 gram tubes.

Cat. No.	Description
CSG-05	Cimeosil Scar and Laser Gel-5 gram tube
CSG-14	Cimeosil Scar and Laser Gel-14 gram tube

Cimeosil® Scar and Laser Gel 12-pack

Save by choosing an economical 12-pack carton of Cimeosil® Scar and Laser Gel with either 5 gram or 14 gram tubes.

Cat. No.	Description
CSG-05-12PK	Cimeosil Scar and Laser Gel-5 gram tube
CSG-14-12PK	Cimeosil Scar and Laser Gel-14 gram tube

CIMEOSIL® GEL SHEETING

Recommended for older, deeper, more persistent scars. Gel sheeting is self-adhering, reusable and washable. All gel sheeting can be cut down to fit specific scar areas. A drying mat is included with each sheet.

Gel Sheeting – Long Strip

To reduce large straight scarring resulting from cesarean sections, appendectomies, cardiac surgery, plastic surgery of the thighs and waist and non-surgical trauma. Sold individually, save by purchasing 6 units or more.

Cat. No.	Description
GS-LS	Long Strip

Gel Sheeting – 4" x 5"

Multi-purpose - can be cut down to fit specific scar areas. Sold individually, save by purchasing 6 units or more.

Cat. No.	Description
GS-04-05	Sheet

Gel Sheeting – Areola Circle

To reduce scarring resulting from areola reconstruction or breast augmentation surgery. Sold individually, save by purchasing 6 units or more.

Cat. No.	Description
GS-AC	Areola Circle

Gel Sheeting – Vertical Mastopexy ‘Lollipop’

To reduce scarring from areola reconstruction, breast reduction or reconstructive surgery. Sold individually, save by purchasing 6 units or more.

Cat. No.	Description
GS-VM	Vertical Mastopexy

Gel Sheeting – Breast Reduction ‘Anchor’

To reduce scarring of typical incisions that result from breast reduction or reconstructive surgery. Sold individually, save by purchasing 6 units or more.

Cat. No.	Description
GS-BR	Breast Reduction

Cimeosil® Drying Mat

Each Cimeosil® Gel Sheeting product comes with a convenient drying mat. With its aerated grid, this plastic mat provides an ideal drying surface for your just-washed gel sheeting.

ORTHOPAEDIC PRODUCTS

WeL® Anti-Clog Suction Tubes

Suction Where You Want It...

Suctioning body fluids and particles is critical to any procedure. Too much suction can cause tissue damage, while too little suction can reduce visibility at the surgical site.

..When You Need It

The WeL® family of disposable, malleable suction tubes consists of full-flow, anti-clog tips for maximum on-the-spot aspiration, with the Positive Control On/Off Valve giving you complete control of the suction force.

Gelzone® Suspension Sleeve

Uniquely combines ease of use and comfortable, secure suspension.

Gelzone® Wrap

Made of stretchable, fabric-covered silicone gel, the patented Gelzone® Wrap is the only choice that combines compression healing, musculoskeletal support and scar management. The wrap stays exactly where it's put while providing ideal uniform compression. Excellent for flattening and fading keloids and hypertrophic scars.

WeL® Orthopaedic Suction Tube

The Orthopaedic Suction Tube ensures unparalleled aspiration for bone chips, body fluids and tissue. The constant 1/4-inch internal diameter provides full flow for even the most demanding surgical procedures.

Cat. No.	Description	Quantity
3706-ST	Individually Packaged & Sterile	50
3706-B	Non-Sterile in bulk	100

WeL® Bullet Nosed Tip

The Bullet-nosed five-hole tip maximizes aspiration. If one of the holes becomes clogged with tissue or debris, the other holes will compensate providing a true anti-clog tip. Its Positive Control On/Off Valve gives you total control of the suction force.

Cat. No.	Description	Quantity
5091-ST	Individually Packaged & Sterile	50
5091-B	Non-Sterile in bulk	100

WeL® Retractor-Nosed Tip

The Retractor-nosed five-hole tip aids in moving tissue aside for improved visibility. Like the 5091, the Retractor is also anti-clog and allows complete control of the suction force with the On/Off Valve.

Cat. No.	Description	Quantity
5092-ST	Individually Packaged & Sterile	50
5092-B	Non-Sterile in bulk	100

Gelzone® Suspension Sleeve

Ideal for procedures requiring a stable, upright patient arm, the Gelzone® suspension sleeve features silicone gel sheeting covered by fabric. The silicone provides a non-slip surface against skin, while the fabric enables secure and comfortable closure around the patient's arm with Velcro tabs. Using a Velcro™ ring tab secured to the end of the sleeve, the arm is suspended at the desired position by a traction device. Choose the Gelzone® Suspension Sleeve for all elevated-arm procedures.

Cat. No.	Description	Size
SLV-634	Sterile Suspension Sleeve	6" x 34"

Dimensions in inches

GELZONE® WRAP

Benefits include non-slip compression for healing (after wound closure), complete silicone gel contact on closed wounds for scar management in difficult areas, general joint for muscle support and cold-wrap therapy. Velcro closure (extra tabs provided). All Gelzone® Wraps can be cut to size using scissors.

Gelzone® 1" x 12" Wrap

Color: White

Abdominal Support & Scar Management (After Liposuction); Abdominal Support & Scar Management (After C-Section); Abdominal Support & Scar Management (After Tummy Tuck); Arm Support & Scar Management (After Brachioplasty); General Joint or Muscle Support; Cold Wrap Therapy; Compression for Healing; Hamstring or Hip Pointer; Rib or Thorax Wrap; Osteoarthritis and Scar Management.

Cat. No.	Description
WRAP-1048	10" x 48" Wrap

Gelzone® Pressure Pillow

Use this small silicone pillow under your Gelzone® wrap to localize pressure on the muscle. Focused pressure, concentrated on the muscle, provides more support, more pain relief, and less constriction. Use the Pressure Pillow on your wrist, elbow, knee – wherever more pressure feels better!

Cat. No.	Description
PP-1530	Pressure Pillow

ORDERING INFORMATION

Thank you for your interest in Implantech's superior aesthetic products. We're pleased to offer various ways in which to order:

Customers within the USA:

Go on line at www.implantech.com

- New customers: Access "Physician Registration" to create an account, then login
- Existing accounts: Access "Physician Login"
- Shop, order and pay with Mastercard, Visa or American Express

Call or email our friendly and knowledgeable customer service specialists:

800-733-0833

customerservice@implantech.com

Contact your area's Implantech sales representative – to obtain their information, please contact customer service.

International Customers:

Orders must be placed through an Implantech distributor in your country. To find a distributor, please access our "Distributor Locator" page at

www.implantech.com/distributor

Call or email our international customer service department:

805-339-9415

international@implantech.com

Product Returns:

All returns and exchanges must be pre-authorized by calling Implantech for a 'Return Goods Authorization' (RGA) number.

Patient-specific products and opened implant packages are non-returnable, and freight charges are ineligible for credit or refunds.

For our complete return/exchange policy, please refer to

www.implantech.com/return-policy.
