

NAGÔR™

MADE IN GREAT BRITAIN

Founded in 1979, Nagor is the only British company dedicated to the specialist design, manufacture and supply of high quality breast implants and related medical devices.

Nagor's commitment to quality is demonstrated by ongoing research and development with investment in manufacturing processes, supported by the most demanding quality control management.

Customer satisfaction has led to an extensive and continually expanding worldwide network of distributor partners in over sixty countries.

Nagor's products are manufactured under a quality management system in accordance with ISO and EN requirements and have received CE certification by examination against the requirements of the Medical Devices Directive (93/42/EEC).

Features

Barrier Layer:

All Nagor implants are manufactured with high performance silicone elastomer layers to enhance shell integrity and have a unique 360° barrier layer to minimise gel diffusion.

Texturing:

Our unique Nagotex® silicone shell surface is designed to offer a disruptive contact surface for collagen interface.

Choice:

Nagor's comprehensive range of breast implants offers surgeons 270 options in silicone round and anatomical configurations. Saline implants are on a made to order basis with a lead time of approximately six weeks.

Sizers:

Nagor gel-filled and inflatable sizers are available for most sizes within the Impleo, Impleo Smooth, GFX, RGI and core sizes within the CoGel® range.

Tissue Expanders

Two Stage Tissue Expanders with Integrated Valve

- Anatomical Shape, Textured
- Large Integrated Injection Site with Self-sealing Technology
- Reinforced Base Layer to ensure Unidirectional Expansion
- Re-usable & Ergonomically Shaped External Location Device
- Compliments the CoGel range of Anatomical Implants

All device dimensions correspond to the suggested volume

Nagor Two Stage Tissue Expanders with Integrated Valve must be filled with a sterile isotonic solution only.

A 21 gauge standard bevel hypodermic needle must be used in order to inflate the device through the injection site.

External Location Device (can be ordered separately)

Silgel®

The Silgel® family of products has been developed to extend the concept of gel therapy by utilising high molecular weight Silicone gel (polysiloxane).

Silgel® and Silgel® Sheet are easy to apply and help to reduce and soften hypertrophic and keloid scars and associated erythema.

Silgel®

Silgel® products are listed on the UK Drug Tariff Register.
